-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

1. Claims 1-5 are pending in the application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-5, the term ---characterized in that ---- is vague. The applicants are suggested to use the term --- wherein ----.

In claim 1, the term ---manufacturing of ---- is vague. The applicants are suggested to use the term --- preparing or preparation of ----.

In claim 1, last line, the applicant's are suggested to delete ----a polar aprotic solvent, e.g. ---- since the specification teaches using only acetonitrile and furthermore, there is no mention of any other polar aprotic solvent besides acetonitrile.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1625

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miyasaka (U.S. Patent 4,604,463).

Miyasaka discloses a process for preparing 7-ethyl-10-[4-(1-piperdino)-1-piperdino]carbonyloxycamptothecin by reacting 7-ethyl-10-hydroxycamptothecin (compound of instant formula II) with 1-chlorocarbonyl-4-piperidinopiperidine (compounds of instant formula III, see example 28 in col. 25). The process of Miyasaka meets all the limitations of instant claims except that Miyasaka uses pyridine instead of instant 4-dimethylaminopyridine in the condensation reaction. However, the reactants (compounds of formulae II and III) and the product are identical in the process of Miyasaka and therefore, in absence of any unexpected results, it would have been obvious to one skilled in the art to use substituted pyridine instead of pyridine in the condensation process for preparing 7-ethyl-10-[4-(1-piperdino)-1-piperdino]carbonyloxycamptothecin.
